My Blinds Market
Natural Plant Resource

Bamboo

Bamboo is a sustainable material, ideal for construction, textiles, and even food applications. It is also commonly used in papermaking and decorative crafts.

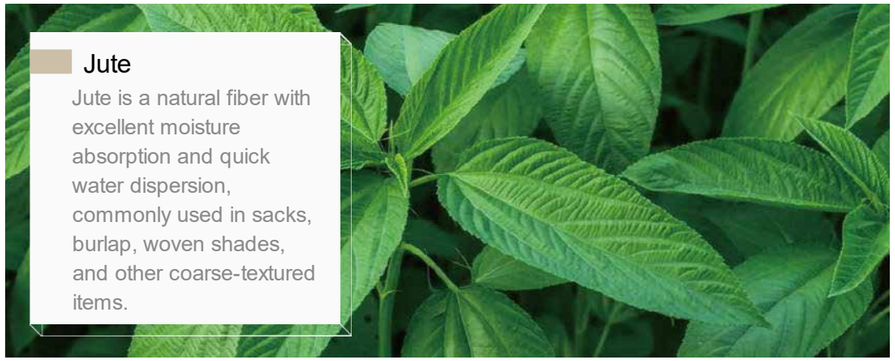

Ramie

Ramie is a strong, breathable natural fiber, commonly used in textiles, home furnishings, and sustainable materials.

Flax

Flax is a strong, breathable, and moisture-wicking natural fiber, commonly used in linen fabrics, ropes, and home textiles such as curtains.

Jute

Jute is a natural fiber with excellent moisture absorption and quick water dispersion, commonly used in sacks, burlap, woven shades, and other coarse-textured items.

Manila hemp

Manila hemp is a strong, durable fiber native to the Philippines, commonly used in ropes, bags, and industrial textiles. It is naturally decay-resistant and environmentally friendly.

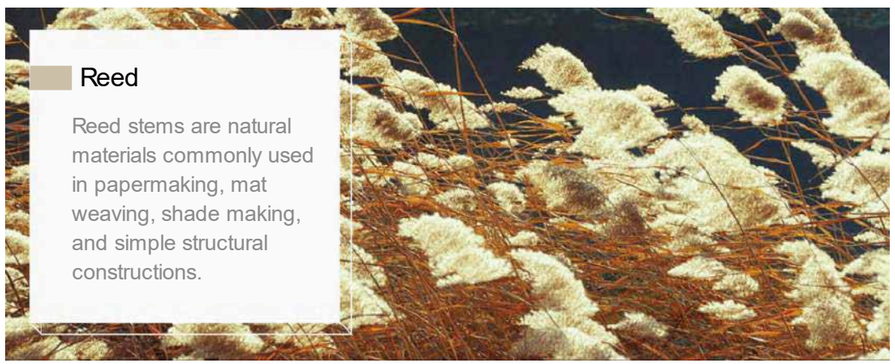

Kenaf

Kenaf is a soft yet strong and elastic natural fiber, commonly used in weaving burlap, sacks, fishing nets, and ropes.

Typha Orientalis

The entire Typha orientalis plant is a versatile natural material—commonly used in papermaking, weaving, and even lighting.

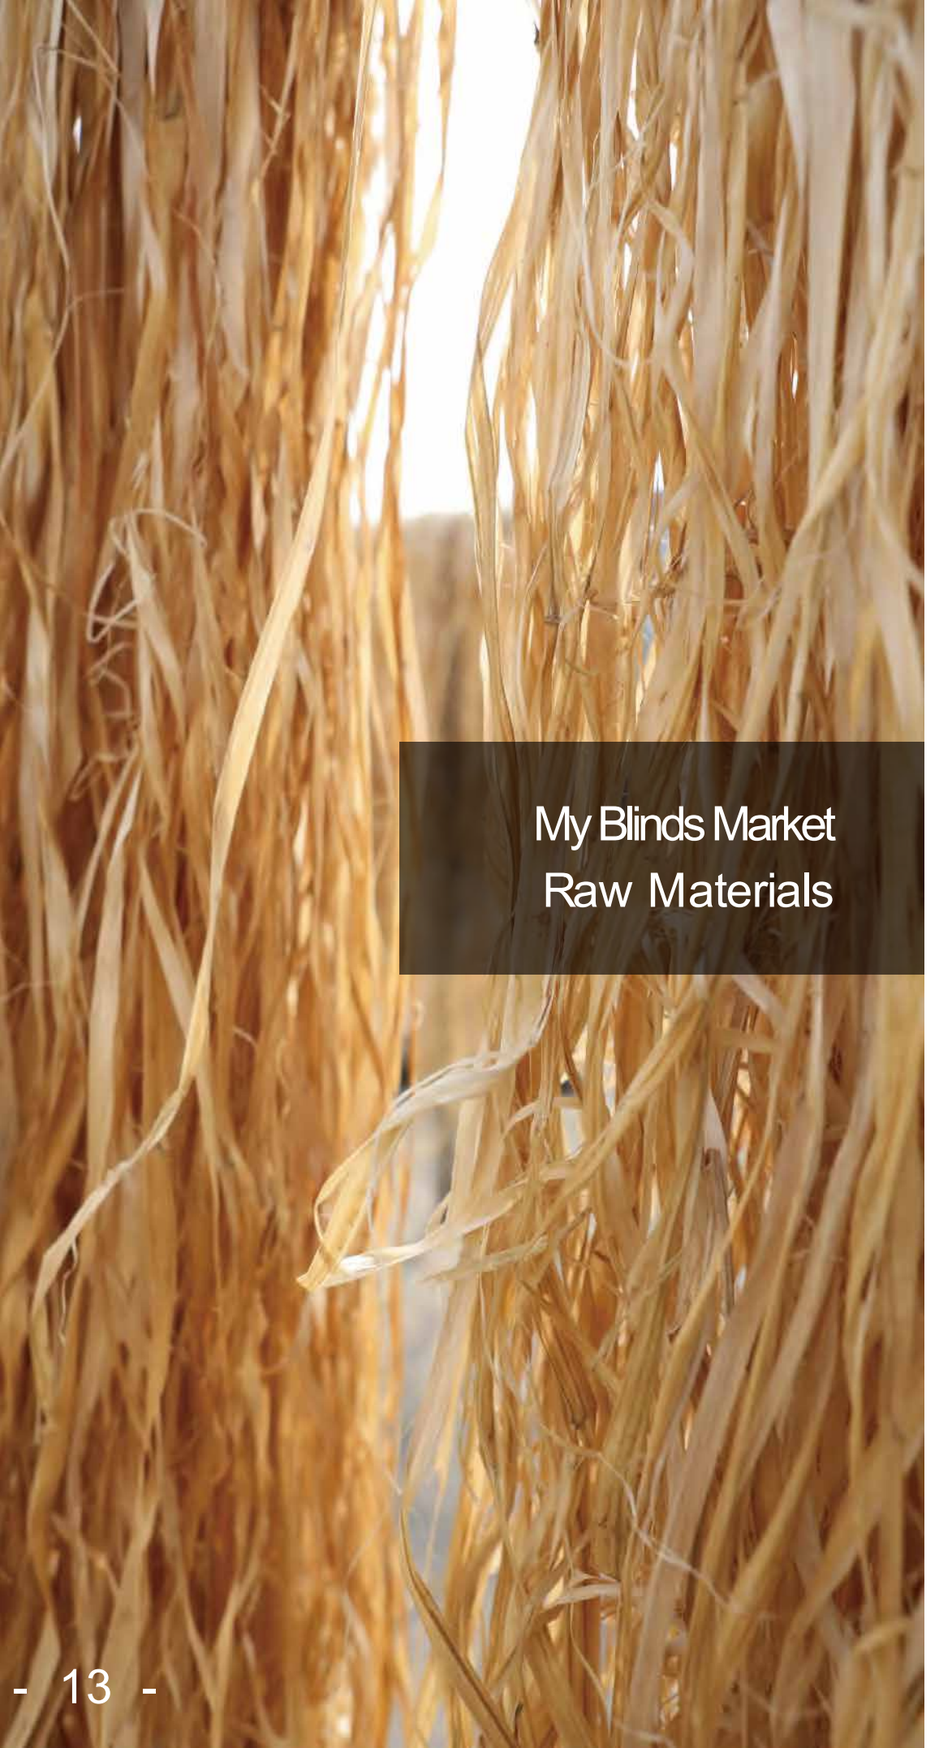

Reed

Reed stems are natural materials commonly used in papermaking, mat weaving, shade making, and simple structural constructions.

Bunny Tail Grass

Bunny Tail Grass is a hardy plant—cold-resistant, heat-tolerant, and easy to propagate. It blooms in summer and is widely used in horticultural and decorative applications.

Bamboo Collection

The Bamboo Collection features fabrics made from bamboo matchstick and bamboo matchstick + bamboo slats, offering a natural, modern aesthetic.

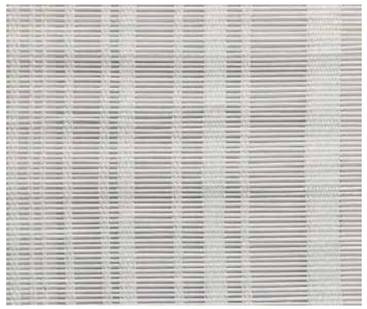

Bamboo matchstick fabrics come in various diameters, from thin bamboo with high light transmittance for Chinese aesthetics, to 2.2mm bamboo matchsticks, providing a modern touch with privacy. Available in white, off-white, natural wood, and black, it suits various interior styles.

The bamboo matchstick + bamboo slat designs, including tortoiseshell bamboo slats, are perfect for traditional Chinese-style interiors, while other options complement modern decor.

Blended Natural Collection

The Blended Natural Collection combines natural bamboo fibers with hemp for an eco-friendly and practical fabric solution.

Bamboo fibers are highly moisture-absorbent and breathable, effectively regulating indoor humidity. Paired with hemp’ s natural antibacterial and anti-mold properties, this fabric promotes a healthy living environment.

The fabric blends the flexibility of bamboo with the firmness of hemp, offering natural drape, wrinkle resistance, and durability. It is perfect for a variety of modern styles, including minimalism and wabi-sabi.

We offer versions with 50%-80% light blocking, suitable for bedrooms, living rooms, and other spaces.

Rustic Fibers Collection

The Rustic Fibers Collection showcases the raw beauty of nature's materials, blending rugged textures to create a warm and simple atmosphere. This collection features fabrics made from natural fibers like jute, kenaf, ramie, and Bengal hemp, combined with handcrafted knotting techniques that bring a rustic yet warm aesthetic to life. Each piece radiates a rugged charm, perfect for creating cozy, natural interiors.

These fibers are not only durable but also environmentally friendly, offering exceptional strength while supporting sustainable practices. The rough textures add tactile depth to the fabric, while the earthy tones infuse spaces with a grounded, humble beauty.

Whether used for window coverings, wall decor, or soft furnishings, the Rustic Fibers Collection brings natural, rustic beauty to your home, making it ideal for modern minimalist, rustic, and farmhouse-inspired designs.

Fine Weaves Collection

The Fine Weaves Collection is built on the strength and breathability of linen and ramie, with delicate accents of Bunny Tail Grass, Bamboo Shoots, Cotton Fiber, Vanilla, Reed, and Chinese Knot. This unique combination creates a sophisticated blend of textures, offering both natural elegance and a tactile depth that enhances any space.

The base of linen and ramie provides durability and comfort, while the additional elements bring nature’ s charm into the design. Bunny Tail Grass and Bamboo Shoots add a rustic, organic touch, while Cotton Fiber and Vanilla infuse the fabric with warmth and softness. The decorative accents of Reed and Chinese Knot elevate the fabric’ s visual appeal, making it perfect for modern, Chinese-inspired, Japanese, or Song Dynasty aesthetics.

Ideal for use in window coverings, soft furnishings, or home decor, the Fine Weaves Collection brings a timeless, refined beauty to any room.

Wood & Paper Collection

Paper, as an important invention of human civilisation, has a long history and is widely used.

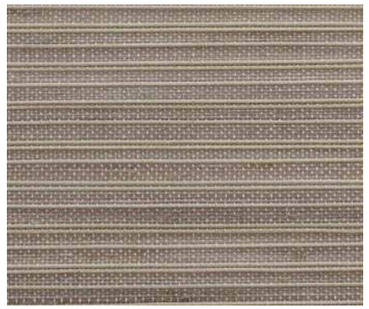

In ancient times, the appearance of paper changed the way of information dissemination. Countless wisdom and emotions were transmitted and retained through paper.

Our paper has been specially treated and made into paper rope, which is used as a unique material for weaving shades. These paper rope shades are unique, both beautiful and practical.

Roller Collection

The Roller Collection is made from natural materials, designed for smooth rolling and a clean finish, ensuring no misalignment during use. These fabrics are specifically designed for roller shades and are not interchangeable with Roman shade fabrics.

The collection can be paired with aluminum casings, wooden casings, or left without casings for a minimalist look.

The collection offers multiple lift system options:

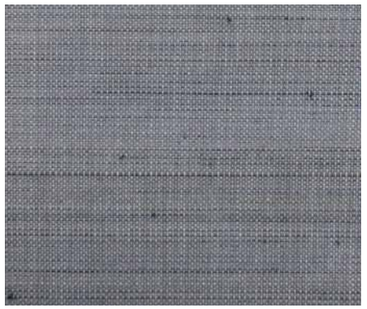

- Corded System
- Cordless System
- Motorized System

Perfect for modern spaces, the Roller Collection combines eco-friendly materials with durability, providing both functionality and style for any interior.

Cotton and Linen Fabric

My Blinds Market Woven Wood Shade-
Fabric Characteristics & Care Guide

Our shades are mainly made of natural material like jute, paper, grass, reeds, Bamboo etc. We may also apply some non-natural material like metallic yarn, machine made fire. The characteristics of the different materials bring the uniqueness and natural beauty into our products. Now we need to tell you more about the material characteristics and how to care when you use our shades.

1. Different country of origin, years, climate and time of harvest will give differences to natural material from batch to batch. Sometimes the color will vary in the same batch because of the exposure to the sunlight or different content of oxidation. When the shades are hanging in the same room, we will make sure all the colors are consistent details aligned. So please make a remark in the order if the shades are hanging in the same room.

2. All the natural materials in our products are processed manually. Each material or fibre has different thickness so they would not be exactly the same as artificial material. If you find the products your purchased are different to the sample, it is normal and within our specification.
This is one of the uniqueness of natural products, but not the flaw.

3. When the shades are installed and hanged up for a while, it is normal that the shades will drop about 1-2cm because of its own weight; When the shades are exposed to the air and sunlight for 6 months, the color will fade or change due to oxidation or the way they are being consumed.
This is a natural change of natural material products.

The Shire Shades cares and cleaning

1. Cannot wash manually or machine wash
2. Vacuum with hose attachment
3. Dusting spray
4. Can use toothbrush and detergents to brush the shades in small area, then use microfiber cloth to pad and dry the shade, hang up the shades and let it dry up naturally. Do not expose the shade under strong sunlight for a long period.
